

9 April 2024.

Leader Electronics Co.
2-6-33, Tsunashima-higashi, Kohoku-ku, Yokohama, Japan
(Code: 6867, Standard Market)

We would like to thank you for your continued support and patronage.
We are pleased to announce the launch of the following product.

- Product name: 25G IP/12G TSG
- Model Number: LT4670-SER04
- Release date: 9 April 2024 (Tuesday)
- Launch date: May 2024

25G IP/12G SDI TSG option for LT4670 sync generator launched

Leader Electronics (President: Kozo Nagao) is pleased to announce the release of the 25G IP/12G SDI TSG option for the LT4670 sync generator.

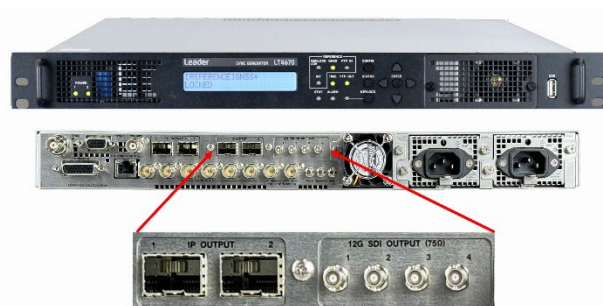

The new release is in response to the recent increase in demand for IP and the need for an IP pattern generator as a reference signal.

The new option is an addition to the LT4670 sync generator, which supports PTP grandmaster and analogue genlock, and supports 25G IP and 12G-SDI signal output. The ST2110 is synchronised to PTP.

12G-SDI support is available for 12G-SDI (4K), 3G-SDI (Level A, Level B), HD-SDI and SD-SDI. 4 independent SDI signal output terminals are provided, each with its own pattern and phase settings.

User pattern output is supported, and BMP / TIFF files can be used as built-in patterns.

It can be used for a wide range of SDI to IP broadcast signal sources.

LT4670-SER04 25G IP/12G TSG option
